

Screen 1

Screen 2

Selecting Create New Artwork from the home screen will direct users to a pop-up where they will need to specify things like canvas size and color palette. Once that is completed they will be taken to screen 3.

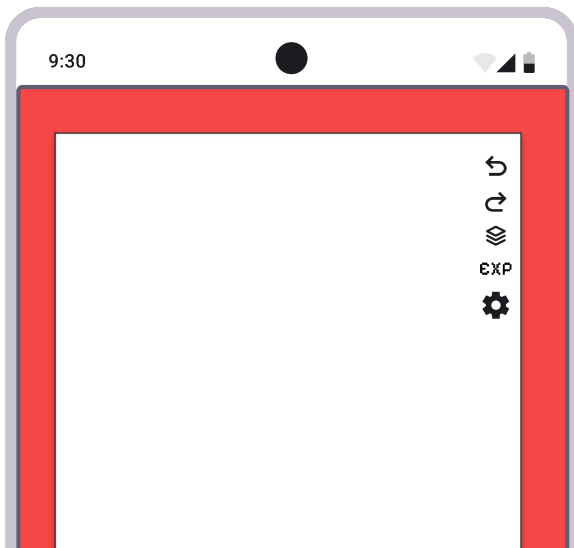

The Art Gallery button will take you to screen 2 which displays previous projects. A button to create a new project will also be provided in screen 2.

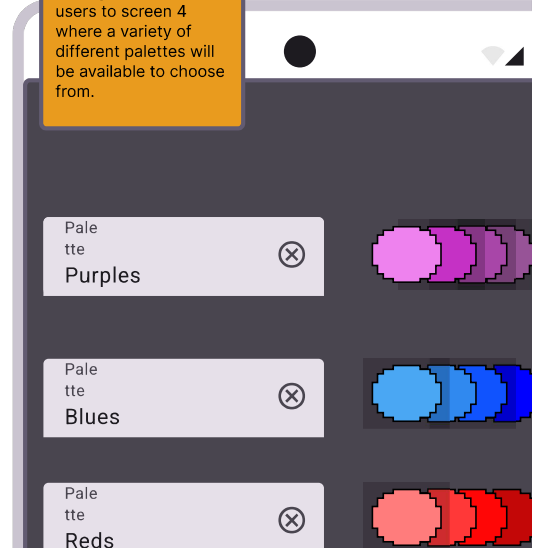

Create new artwork takes you to screen three.

Screen 3

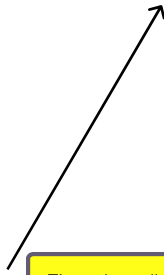

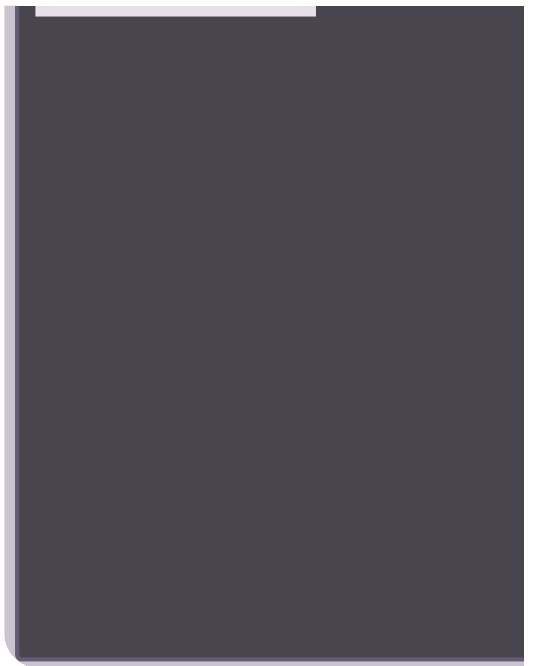

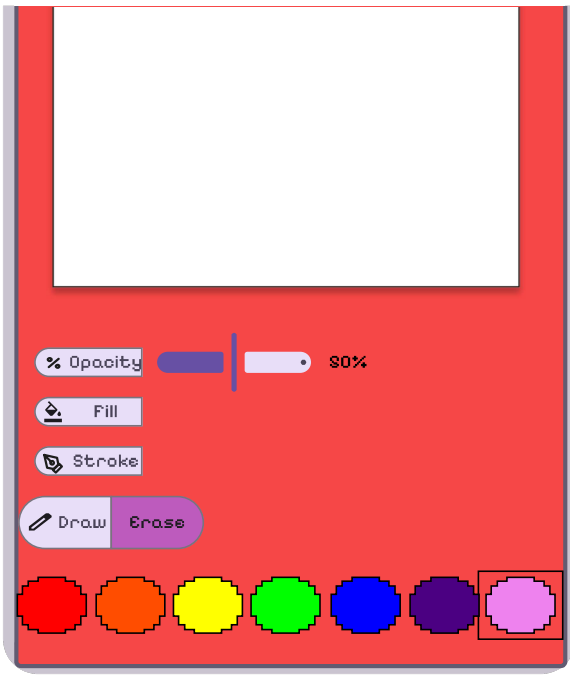

Screen 4

Icons for undo/redo, create/change layer, export, and settings.

Selecting palette manager will direct users to screen 4 where a variety of different palettes will be available to choose from.

The color pallet is located at the bottom of the screen. Users should be able to change the color of the icons as they see fit.
